# Cybersecurity Services

## OUR COMPLETE SOLUTION

- 24/7/365 Help Desk Services
- Expertly Managed Project Services
- Focus on People, Processes and Technology
- Network Management and Architecture
- Dedicated Account Management
- Enhanced Cybersecurity Protection
  - Vetted and Customized Security Templates
  - Tech Stack of 20 IT Tools Fully Vetted, Tested and in Production
  - Strategic Planning with Virtual Chief Information Security Officer Services

## TECH STACK OF IT TOOLS & SERVICES

- **Change Management** – controls, enables and tracks beneficial IT changes with minimum disruption
- **Intrusion Protection Services (IPS)** – actively scans network traffic for malicious activities and known attack patterns
- **System Information and Event Management (SIEM)** – aggregates and analyzes activity across your entire IT infrastructure
- **Firewall** – detects and blocks sophisticated attacks using third generation firewall technology
- **Mobile Device Management (MDM)** – manages mobile devices accessing business data
- **Back-Up and Disaster Recovery (BDR)** – combines multi-day, on-site data backup (every 6-8 hours) and disaster recovery solutions to ensure business continuity
- **Session Management** – tracks, monitors and secures multiple access requests from a single user or entity
- **Secure Email** – protects sensitive information using email encryption
- **Network Diagram** – provides graphical representation of the network infrastructure and relationship between hardware, software and users
- **Spam Filtering** – reduces 99% of risky email and wasted time
- **Patch Management** – deploys and tracks critical updates, secures security holes and keeps system secure
- **Ticketing System** – manages analysis of user-related issues
- **Hard Drive Encryption** – prevents unauthorized access to your data in the event equipment is lost
- **Virtual Private Network (VPN)** – secures remote access for offsite employees
- **Web Filtering** – restricts access to vetted websites
- **System Security Plan (SSP)** – documents cybersecurity policies and procedures
- **Anti-Virus** – provides 99% effective, real time behavior-based protection from malware
- **Vulnerability Management** – identifies, remediates and reports on security vulnerabilities across a network
- **Network Access Control** – prevents unauthorized users and devices from access
- **Remote Monitoring** – centrally monitors and manages equipment, servers and networks
- **Email Phishing & Cybersecurity Training** – ensures users are trained to identify threats

*Quality is our only measurement of success. Our goal is to consistently deliver exceptional customer service and defect-free solutions on time and on budget - every time! SSE Network Services' culture fosters continual improvement based on an established quality management system, making us a valued business partner.*

SSE has been accredited by The CYBER AB (formerly the CMMC Accreditation Body) as a Registered Provider Organization (RPO)

## TECH STACK OF IT TOOLS & SERVICES

### SSE MANAGEMENT TOOLS

Ticketing System

Remote Monitoring

Client Database

Reporting

### FOUNDATIONAL CYBER HYGIENE

Meets CMMC Level 1  
Requirements

20 Group Policy Objects

Email Phishing & Cybersecurity  
Training

Firewall

Back-Up & Disaster Recovery

Anti-Virus

Vulnerability Management

Patch Management

Network Access Control

### ADVANCED CYBER HYGIENE

Meets NIST 800-171  
CMMC Level 2  
Requirements

Multi-Factor Authentication

Intrusion Detection/Prevention

System Information and Event  
Management

Email Encryption

Spam Protection

Mobile Device Management

Web Filtering

Configuration Management

Software Management

Session Management

VPN

Hard Drive Encryption
